

„In Perspectives we Take a Stand”

The Euregio „Lake Constance” has contributed significantly to the cultural and political development of Europe. The monasteries in St. Gallen and Constance are early symbols of Christianity in middle Europe. Between 1414 and 1418 Constance was the center of Christianity.

We have the privilege to be located between these great centers of culture. Besides its history, our region has become an economically attractive place for the settlement of future-oriented companies. The central location, the good international connections, quick access to the European centers of finance – be it by car, train or plane, unbureaucratic authorities -, attractive taxes, flexible labor laws and low labor costs are important local advantages.

The local universities and colleges give a fresh impetus to our region and produce highly qualified and motivated employees. These factors as well as low real estate costs make our region an attractive place to start a new company or to change the domicile of an existing company.

The beautiful scenery between the Lake Constance and the Alps, the vast variety of educational and spare time opportunities as well as open-minded people contribute to the high quality of life in the Euregio “Lake Constance”. You benefit from internationally cast operas, concerts, as well as first class museums, exhibitions and cross border performances which connect the people around Lake Constance and blur the political borders.

Our region is not only a place with great history and good economic conditions but is also well known for its high standard of living.
